"Cotton." Dr. Kmapp says, "is not notually very high. It is high as compared with prices in former years, not as compared with current prices of other commodities. Before the farmer decides that the high price of cotton will warrant his planting the entire acresses to that crop to the neglect of all cise, he says, he had better make a pretty thorough examination of the retail prices of the necessities of life at the place where he must purchase them during the year if he falls to produce them on his own farm.

Dr. Knapps cultine of a safe-planting program for 1820 includes Good home gardens. Maintained production of content hay and forsage crops for Southern livestock for one year. Maintained production of meats and increase of eggs and milk production.

"There is no thought, says Dr. Knapp, "that cotton acreage ought to be reduced, but only that the lure of price should not blind our eyes to the necessity of food and feed crops. If we provide for the necessaries of life and a well-balanced husbandry, the production of cotton can be sustained in a good season and the presperity of the recessity of food and come now is mainly not to reduce the some now is mainly not to reduce the some now is mainly not to reduce the some now is mainly in the product well-balanced husbandry, the product well-balanced husbandry, the product well-balanced husbandry is product of the sustained in a section can be sustained in a

CHICAGO, Feb. 11.—The export trade of the meat packers, the largest single industry in America, has practically ceased as a result of the foreign trade situation, the Institute of American meat packers announces in a bulletin. During the last calendar year the exports of pork products alone exceeded 2,500,000,000 pounds. Beef exports cased some time ago, and, during the past month pork exports have practically stopped, the bulletin says.

# Can You Do More Work by Neglecting Sleep

THEN a man finds himself up against more than he can do, his solution may be shorter hours instead of longer-more sleep instead of less.

There is no greater help to good work, and keen enjoyment in doing it, than plenty of that deep, sound sleep that wakes a man up feeling alive all over.

When a man finds that he is not sleeping properly, he should look to his bed. No one can sleep soundly unless his bed is noiseless and steady.

THE truly noiseless Bed is I the Simmons Metal Bedbuilt for sleep.

Just as the truly 3leep-inducing Springs are the Simmons Springs-fine resilient springs that invite the body to relax.

Years ago Simmons Company established the principle of Beds and Springs built for sleep.

It is today the largest maker of fine Metal Beds and Springs in the world.

It is a specialist in Twin Beds -a pioneer in that fine modern principle of a separate bed for each sleeper.

Simmons Steel Beds, Brass Beds, Springs, Day Beds and Children's Cribs are the most sought after sleeping equipment in leading stores all over the country.

The prices are little if any higher than for any ordinary beds.

And when you are selecting your Simmons Beds with an eye to their appearance in the room, you will see that Simmons has for the first time established beautiful and authoritative design in Metal Beds.

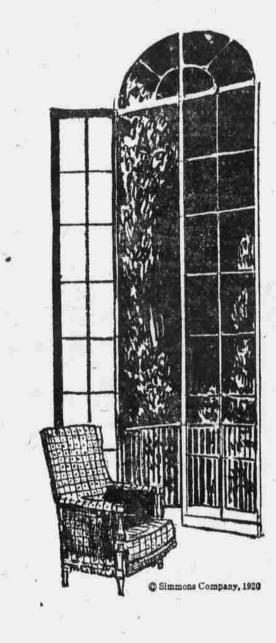

Sleep is a big subject! Write us for the brochure, "What Leading Medical Journals and Health Magazines Say about Separate Beds and Sound Sleep." Free of charge.
